

What's in your winterizing kit?

Confusion?

or

Simplicity!

Winterize with E-Z Pool® and open with confidence!

WINTERIZING DOSAGE:
1 lb (2 scoops)
per 5K Gallons.
For best results,
circulate the pool
for 30 minutes
prior to closing.

5 lb. pail treats
25,000
gallons!

In one E-Z application, E-Z POOL simplifies seasonal pool closings and winterizing for traditional chlorine, bromine, salt water, or E-Z POOL treated pools.

No pre-treating or other chemicals needed. Just add E-Z POOL to oxidize contaminants, prevent algae, and control stain and scale through the winter season.

Makes spring openings faster with clearer water, and you'll be swimming sooner!

- Longer lasting than traditional winter kits
- Faster and more effective than multi-product winter kits
- Use with chlorine, bromine, salt, mineral, UV and all E-Z POOL treated pools
- Perfect for all in-ground and above-ground pools
- Won't damage your safety or mesh covers.
